FULLY INTEGRATED PATIENT MANAGEMENT AND ACCOUNTING SYSTEM FOR ACUTE HOSPITALS, DAY HOSPITALS & MEDICAL PRACTICES

1) COMPANY PROFILE

Over the last 25 years, GoodX has become one of the *market leaders in the development of tailored medical and practice management software in the South African market*. Dr Dirkie Wolvaardt founded GoodX in 1985 and years of experience, continuous research and development has culminated in a product that is used and trusted by Practitioners, Medical Administrators, Acute Hospitals, Day Hospitals and Sub-Acute Hospitals all over Southern Africa.

The suite of GoodX Medical Administration and Billing Software was developed by a company filled with people who know and understand healthcare financial administration and management. We take pride in having plenty of experience in the medical, financial and development fields. This combination allowed us to develop a product that is easy to use, secure, accurate and integrated.

The GoodX Software system is a comprehensive medical management, accounting and clinical solution ranging from hospitals to large medical centres. The system’s customisability is core to our development approach including features such as integrating with third party software to address client needs.

What makes us different?

At GoodX Software, we understand that no two businesses are alike and that when it comes to accounting software one size definitely does not fit all. We created a world class Accounting and Patient Administration system that is fully integrated and customized to meet the specific business requirements of our clients.

a) GoodX Medical Management Software will help you:

- Increase turnover
- Improve profitability
- Improve patient turnaround times and enhance cash flow
- Reduce bad debt
- Simplify medical scheme claim administration tasks
- Enhance practice management effectiveness and efficiency
- Access patient database anywhere, anytime
- Capture patient clinical notes quickly

b) The GoodX system is based on true financial principles and includes the following:

- Patient scheduling / bookings
- Pre-admissions
- Billing and Coding
- Case Management
- Stock Management
- Electronic Claims Processing System (ECPS)
- Credit Control
- GoodX SMSe
- Creditors Management
- Full integrated accounting package
- Patient clinical history and treatment notes
- Generate 100+ different reports
- GoodX Cloud

2. CUSTOMER SERVICES

As a client of GoodX Software you will have a team appointed to your facility to assist you with the use of your GoodX Software. The team will ensure that you are optimally utilizing all the features of the software and that your practice is on the latest version. All consultants undergo ongoing rigorous training to ensure that your facility remains at the forefront of technology.

3. CLIENT FOOTPRINT

GoodX Software offers services to clients in the whole of South Africa and Namibia. The client profile varies from one-man practices to large medical centres and hospitals. GoodX has about 2900 practices but because of its strong financial core the focus shifted to the corporate healthcare market. These include:

- Acute Hospitals, Day Hospitals & Sub-Acute Hospitals (41 hospitals).

- Other Facilities: Intercare (22 Branches), Health-WorX (10 branches), NHC medical centres (5 branches), Carenow, ER Consulting, Medipark Medical Centre (Drs Landman - largest general practitioners practice in South Africa), Dr Ian Erasmus (Largest dental practice in South Africa), Vermaak & Vennote, Practice Relief (Medi Clinic), Clinical Services (VitalAire), Estelle Bouwer Administration Bureau, Brima Administration Services, Rosh Care Medical Centre Namibia, Large Anaesthesiology groups.
